ANANYA SANKARANARAYANAN

Analytics Engineer – SQL, dbt, Python & BI Reporting

Bonn, Germany | +49 1521 0429943 | LinkedIn | Email

PROFESSIONAL SUMMARY

Data analyst with 4+ years' experience in SQL, Python, dbt and BI reporting, turning ambiguous business questions into clear, reliable analytical deliverables. At MethodHub, wrote SQL transformations in dbt with tests and documentation in Snowflake, and pulled data from APIs and databases. At Valpak, owned data accuracy across 50,000+ monthly records, supported budget planning for buying projects, automated recurring reports and quality checks with SQL, Python and Excel VBA, documented data quality rules, and cut recurring errors by 30%. At Cognizant, wrote and validated SQL across 100,000+ records and built Tableau KPI dashboards that cut manual reporting by 45%. Uses Git and AI tools daily and explains technical points clearly to non-technical stakeholders. Power BI certified (DAX measures); MSc Data Analysis in Business Intelligence (Distinction). Based in Germany; open to relocation.

CORE SKILLS

SQL & dbt: Advanced SQL (joins, CTEs, window functions), dbt models with tests and documentation, Snowflake; data validation across 100,000+ records

Python & Git: Python (Pandas, NumPy, scikit-learn) for analysis and automation, R; Git and Jupyter; API and database pulls

BI & Dashboards: Power BI (certified, DAX measures), Tableau, Qlik Sense; dashboards that convey insights clearly to stakeholders

Data Quality & Automation: Root-cause analysis, documented quality rules, automated recurring reports and checks with SQL, Python and Excel VBA

Communication: Turning ambiguous questions into clear deliverables; explaining technical concepts to non-technical stakeholders; AI-assisted analysis

Certification: Microsoft Power BI Data Analyst Professional Certificate

WORK EXPERIENCE

Data Quality Analyst — 08/2024 – 02/2026

Valpak Ltd (Reconomy Group), Stratford-upon-Avon, United Kingdom | SAP, SQL, Excel (VBA & Macros), Qlik Sense

- Owned data accuracy across 50,000+ monthly records from multiple sources, reducing recurring errors by 30% through root-cause analysis.
- Documented data quality rules and reporting logic across multiple client accounts; supported budget planning for buying projects.
- Automated data collection, quality checks and recurring reports with SQL, Python and Excel VBA macros; pulled data from APIs and databases.
- Presented analysis to Lidl stakeholders and senior colleagues after an on-site product analysis in Ireland.

Programming Analyst — 07/2021 – 08/2022

Cognizant Technology Solutions, Bangalore, India (Client: Colt Technologies) | MySQL, SQL, Tableau, Siebel CRM

- Wrote SQL queries (MySQL) to power Siebel SRM dashboards for B2B client Colt Technologies.
- Built and automated SQL-based KPI reports and Tableau dashboards, cutting manual reporting effort by 45%.
- Ran SQL-based validation across 100,000+ records to keep reporting accurate and reliable.
- Translated stakeholder requirements into KPI definitions and dashboard-ready outputs.

Content & Data Strategist (Freelance) — 03/2026 – 07/2026

Theraspace | Performance Reporting, Data-Informed Strategy, Stakeholder Communication

- Tracked and analysed performance data across channels, translating findings into a data-informed strategy.

Data Analyst Intern — 07/2023 – 10/2023

MethodHub Software Inc., United States of America | Cloud Platforms, dbt, Technical Documentation, Data Management

- Worked in Snowflake and used dbt to write SQL-based data transformations with tests and documentation as part of cloud data platform evaluation work.
- Pulled data from APIs and databases to support analysis and documented the work.
- Compared cloud data warehouse platforms (AWS, Azure, GCP) and presented findings to support business decisions.

- Researched Generative AI applications in enterprise analytics and produced clear, business-facing documentation.

Data Analyst Intern **04/2018 – 07/2018**

Nokia, Chennai, India | Excel, SQL, Data Validation, Reporting

- Analysed network and operational datasets to support engineering teams.
- Prepared reports and visualisations using Excel and SQL to monitor performance metrics.
- Assisted with data validation, troubleshooting, and documentation to improve reporting accuracy.

EDUCATION

MSc Data Analysis in Business Intelligence – Distinction **09/2022 – 09/2024**

University of Leicester | Advanced Statistics, ARIMA Modelling, Data Visualisation (R, Python, Power BI), Cloud Data Platforms

BTech Electronics and Communication Engineering – First Class **07/2017 – 06/2021**

Amrita Vishwa Vidyapeetham | Data Structures, SQL, Python, Machine Learning, Modelling

SELECTED PROJECTS

- **UK Air Pollution Trends & Government Intervention (Dissertation, Distinction):** Analysed 50 years of UK air pollution data with statistical methods and ARIMA time-series modelling and forecasting to assess the effect of government intervention; built interactive dashboards in R Shiny and ArcGIS.
- **Diabetes Prediction using Machine Learning:** Built predictive models in Python (SVM, Random Forest) achieving 85% accuracy through feature engineering and dimensionality reduction.

LANGUAGES

English – Highly Proficient (fluent) | German – A2, actively progressing toward B1
